WATCH THIS HACKER BREAK INTO MY CELL PHONE ACCOUNT IN 2 MINUTES

המסוכן (נורא)

- תפוס את הדגל •
- "דע את האויב"
 - חרב פיפיות
 - <u></u>- כייף!

- אבל •
- <u></u>מסוכן!

3 IBM Security EFM

הטוב – חשוב מחוץ לקופסא

IEEEXtreme 2009

- #/bin/csh
Make sure we are using only the input digits and allowed operators
tr -d '+\-*/()' < output | diff input —
if (\$? == 1) exit 1
Make sue no two digits are left without an operator between them
grep '[0-9][0-9]' output
if (\$? == 0) exit 1
Once we passed the preconditions above, Score according to number of
exercises solved correctly
sed 's/\$/-99.9999999/' output | bc -l | grep -c '^.00000'</pre>

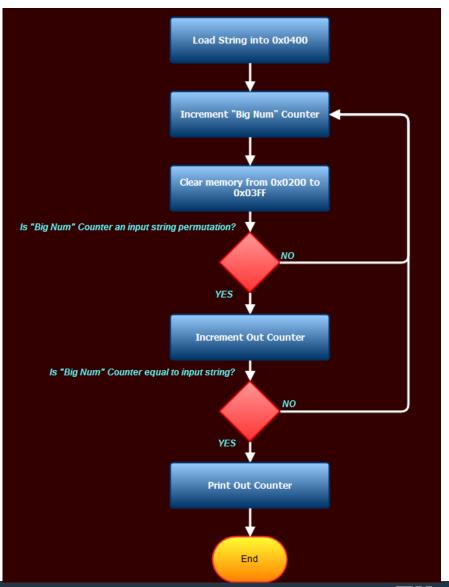

How do you get to 100 from 5750004?

Statement of Good Security Practices: IT system security involves protecting systems and information through prevention, detection and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, misappropriated or misused or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service or security measure can be completely effective in preventing improper use or access. IBM systems, products and services are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective. IBM does not warrant that any systems, products or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
